Art Unit: 1755

1. The communication filed 8-09-2002 is considered to be a response to the office action mailed 4-9-02. By applicants own admission the preliminary amendment was filed after the mailing of the office action.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 15,20, 29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 15,20 the amount of aluminum oxide is outside the amount in the independent claim.

In claim 29 the terminology "biologically acceptable utilizing fibers" is confusing. Deleting "utilizing" will overcome this rejection.

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claims 1-29 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Massol et al and Lakatos et al "Viscosity and Liquidus.....".

Lakatos et al teach compositions which fall squarely within the ranges of the instant claims. See compositions of examples 17-25. The products of identical compositions may not have mutually exclusive properties. In re Spada 15 USPQ2d 1655,1658 (Fed. Cir. 1990).

Art Unit: 1755

Massol et al teach fiber compositions which fall within the instant claims, see column 2 lines 19-30.

The claims are considered anticipated or in the alternative the subject matter as a whole would have been obvious to one having ordinary skill in the art at the time of the invention to have selected the overlapping portion of the range disclosed by the prior art because overlapping ranges have been held to be a prima facie case of obvious, see *In re Malagari*, 182 U.S.P.Q 549.

Applicants argument that both of the above references were cited in the parent application and the claims were found patentable is not persuasive in overcoming the rejection of the instant rejected claims. The instant claims are not identical to the claims in the parent applications. The rejections are maintained.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,

Art Unit: 1755

will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
